Universitätsstraße 38, 70569 Stuttgart, Germany

**Abstract.** Summary of our paper (70-250 words)

## 1 Introduction

## 2 History

### 2.1 The first browser

The first browser for the web was also an invention of the founder of the web, Tim Berners-Lee. The browser was called *WorldWideWeb* and was introduced to the world in the year 1990. A few years later, in 1994, the Browser was renamed *Nexus*. The browser *WorldWideWeb* was, a part of the fact that it was the first browser, also the first HTML editor.

## 3 Evolution

## 4 Summery/Conclusion
